SWISS TECHNOLOGY FOR SURGERY

ACCUJECT™ / ACCUJECT™ SCREW

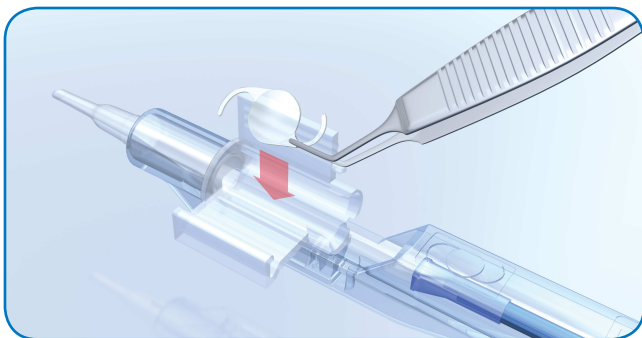

Medicel's ACCUJECT™ model is the most versatile injection system of all time. Its technologically sophisticated modular system enables maximum flexibility and adaptation to almost any lens design and every surgical technique. ACCUJECT™ allows the injection of 1- and 3-piece lenses, the use of hard- and soft-tips and loading the lens from the top (top-loaded) or from the back (back-loaded). Furthermore, it is also available as a syringe- or screw-type injector, and as a preloaded or nonpreloaded system for hydrophilic or hydrophobic lenses.

Incision sizes range from 3.2mm down to 1.6mm.

These countless versions are all based on a proven basic technology, which injects lenses repeatedly safe into the eye.

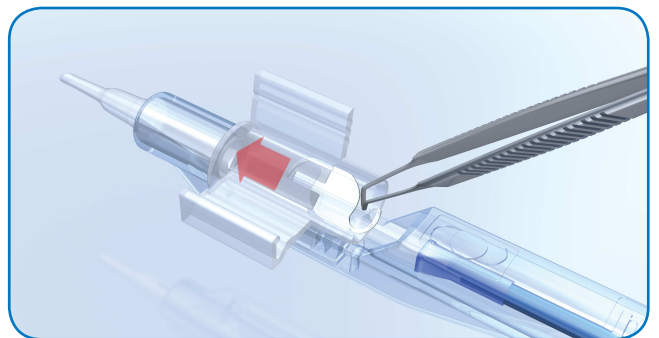

ACCUJECT™ - the all-rounder among lens injection systems.
