SLI-200 Digital Imaging System - Vizualize. Improve workflow. Share.

Frey SLI-200 provides unique quality with fully integrated design already at manufacture stage and does not require external PC. Implement efficient, high-level work flow and integration into clinical practice, with less complicated and more integrated device.

Stream to multiple screens

Stream images and videos across multiple devices. Frey SLI-200 allows you to collaborate with other health care professionals, share knowledge and discuss diagnosis, improve clinical outcomes in real time, easily. Ideal for general practices, educational and training institutions. Video streaming and photo sharing enhance clinical collaboration and education.

Stunning AMOLED tech

AMOLED screen provides superb image quality - better contrast, higher brightness, fuller viewing angle, a wider colour range to capture even the greatest detail of the eye. AMOLED consume less power, enables Frey to simplify the unique design that is ultra-thin with better durability.

Out of the box & stand alone

Work independently and efficiently. Frey SLI-200 does not require external PC or any other device to operate. All cables remain hidden in an ergonomic and minimalistic design. The eye lighting system, which can be controlled using the knob built into the lamp base, is included.

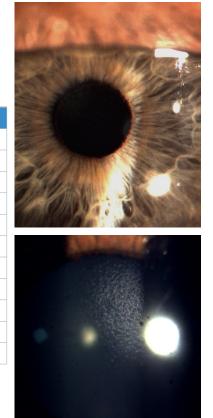

Large & reliable internal storage

Result and image management is an essential part of doctor's workflow. SLI-200 simplifies and speeds up the work with 128GB internal storage. Gather a large number of heavy files. Select, the most interesting photos and sent them to you smartphone - without cluttering it.
