About Us

Optovue Exclusives

Avanti® Widefield OCT with AngioVue® OCT Angiography

The Avanti Widefield OCT offers **state-of-the-art imaging** from the cornea to the choroid with exclusive technology that will change your approach to disease diagnosis and management.

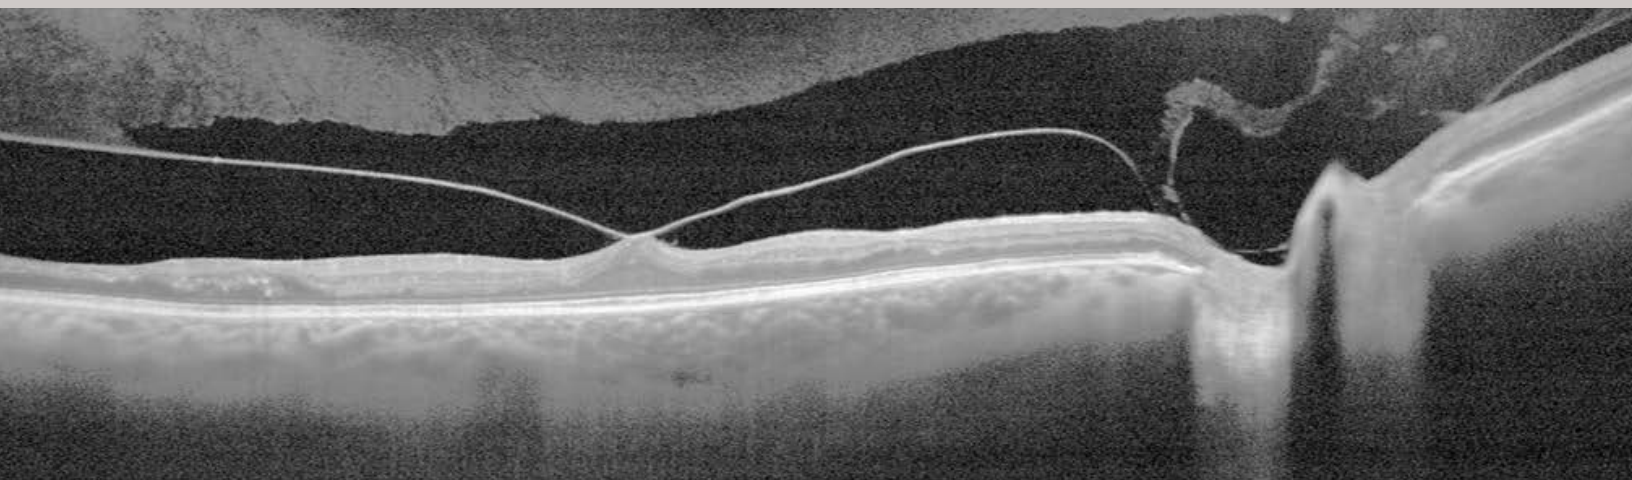

When you're ready, add AngioVue OCT Angiography (OCTA) to the Avanti platform to bring non-invasive vascular imaging with measurement tools to your practice. Ease into OCTA with **AngioVue Essential** or choose **AngioVue Comprehensive** to access all available OCTA features. For the retina specialist, there's **AngioVue Retina**, retina-only OCT and OCTA.

Optovue's flexible product configurations are easily upgradeable, so your OCT system meets the needs of your practice today and into the future.

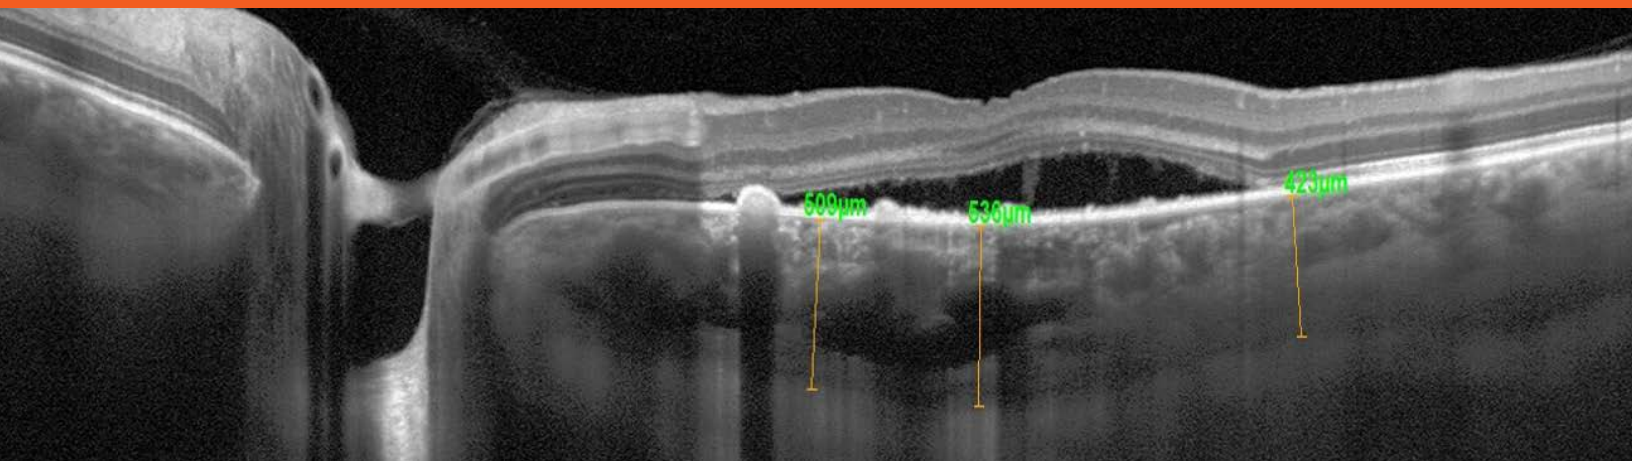

Enhanced HD Imaging of the Vitreous and Choroid

12mm widefield scan with **enhanced depth imaging** mode provides high resolution views (5 μ m axial resolution and 15 μ m transverse) of the vitreous, retina and choroid with **quantitative analysis tools**.

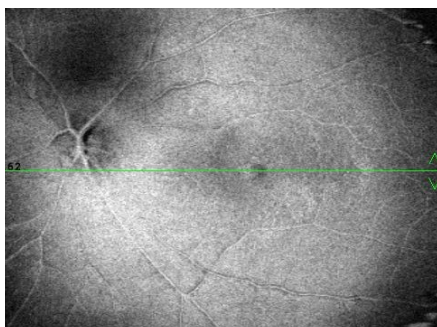

Visualize the vitreous and choroid with the Enhanced HD Line scan and quantify choroidal thickness with the caliper tool.

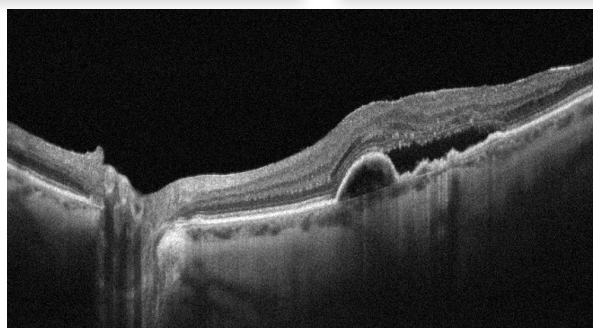

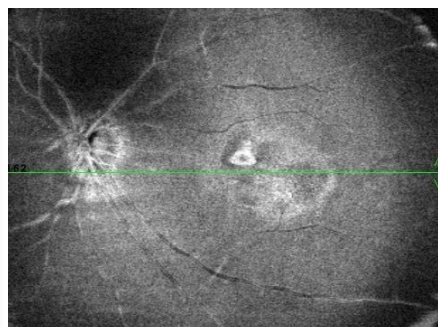

3D Widefield En Face Imaging

See the retina in three dimensions and **study individual layers** of the retina with en face imaging. Quickly identify structural abnormalities with the Widefield En Face Quad Image report.

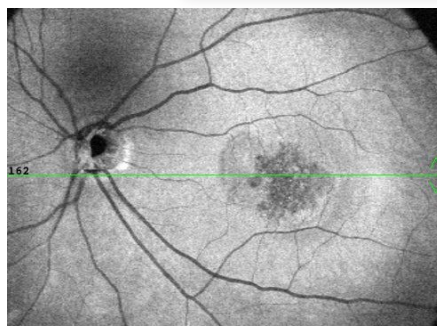

Vitreous

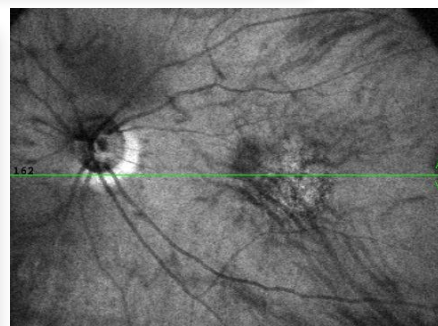

Neurosensory Retina

RPE

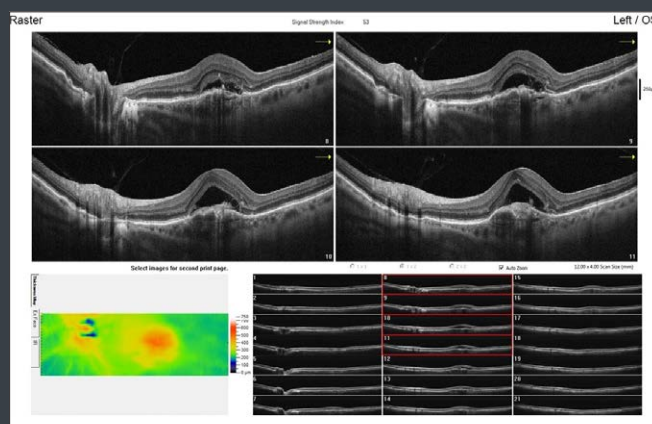

Choroid

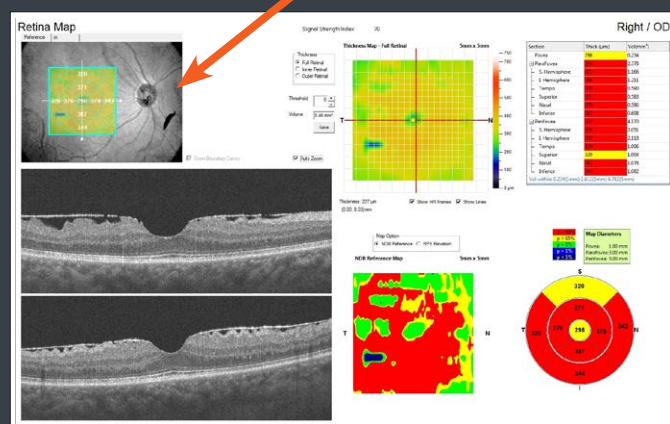

Comprehensive Retinal Analysis

Avanti reports provide a comprehensive assessment of the retina in an **easy-to-read** format.

AMD Case: 21-line Raster scan with thickness map.

Automatic Fovea Centration

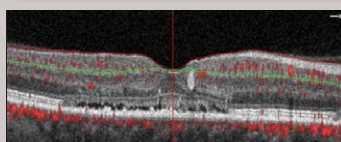

Epiretinal Membrane Case: Retinal Thickness Map with comparison to a normative database.

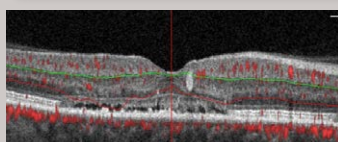

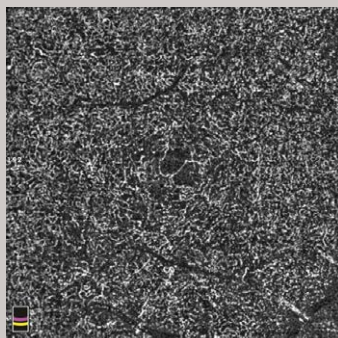

AngioVue OCT Angiography

Add AngioVue OCTA to the Avanti platform to enable **non-invasive vascular imaging** of retinal and optic disc vessels.

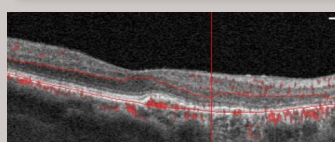

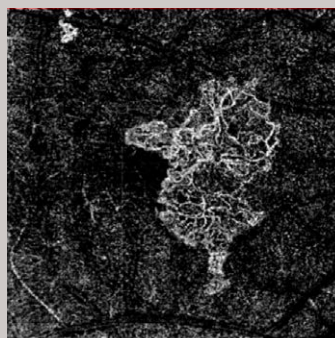

Superficial Plexus

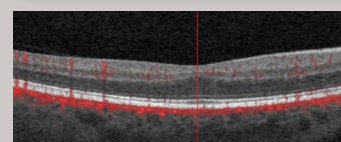

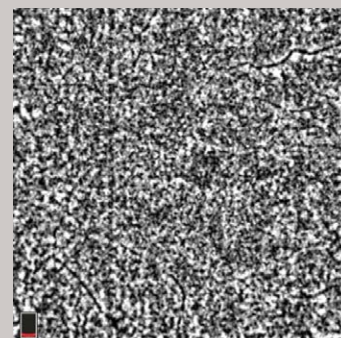

Deep Plexus

Outer Retina Zone

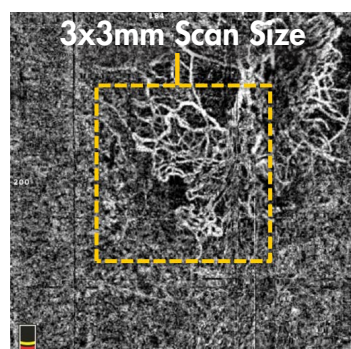

Choriocapillaris

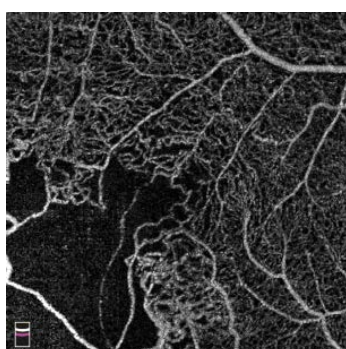

AngioVueHD™

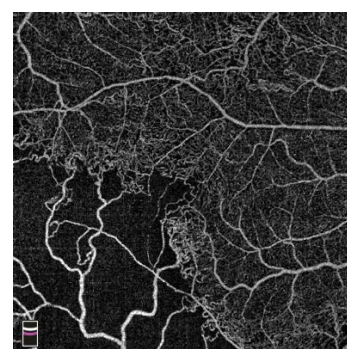

High density OCTA (400x400 vs. traditional 304x304 density) provides unprecedented views of the fine vessels extending beyond the central 3x3mm region of the macula. AngioVueHD affords the highest resolution for large format images.

CNV

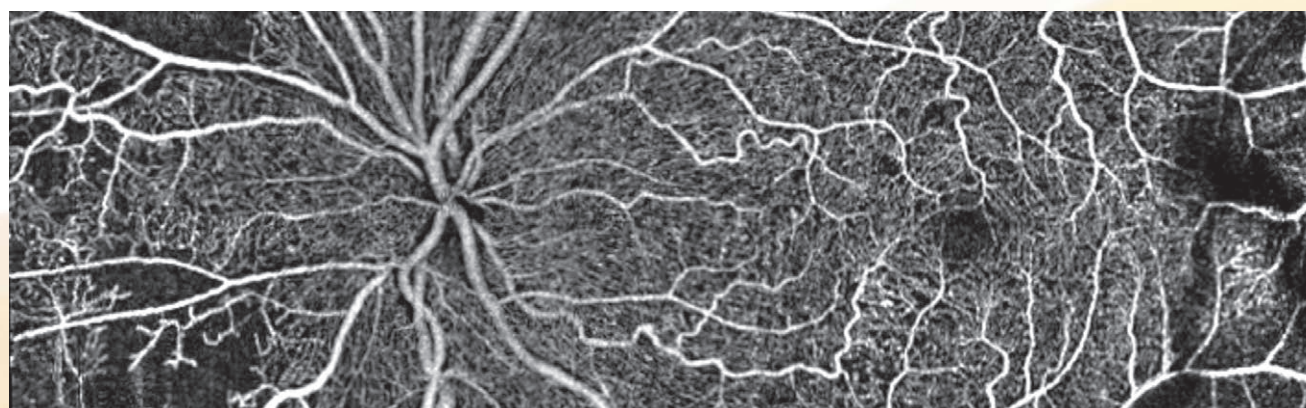

BRVO 3x3mm

BRVO 6x6mm HD

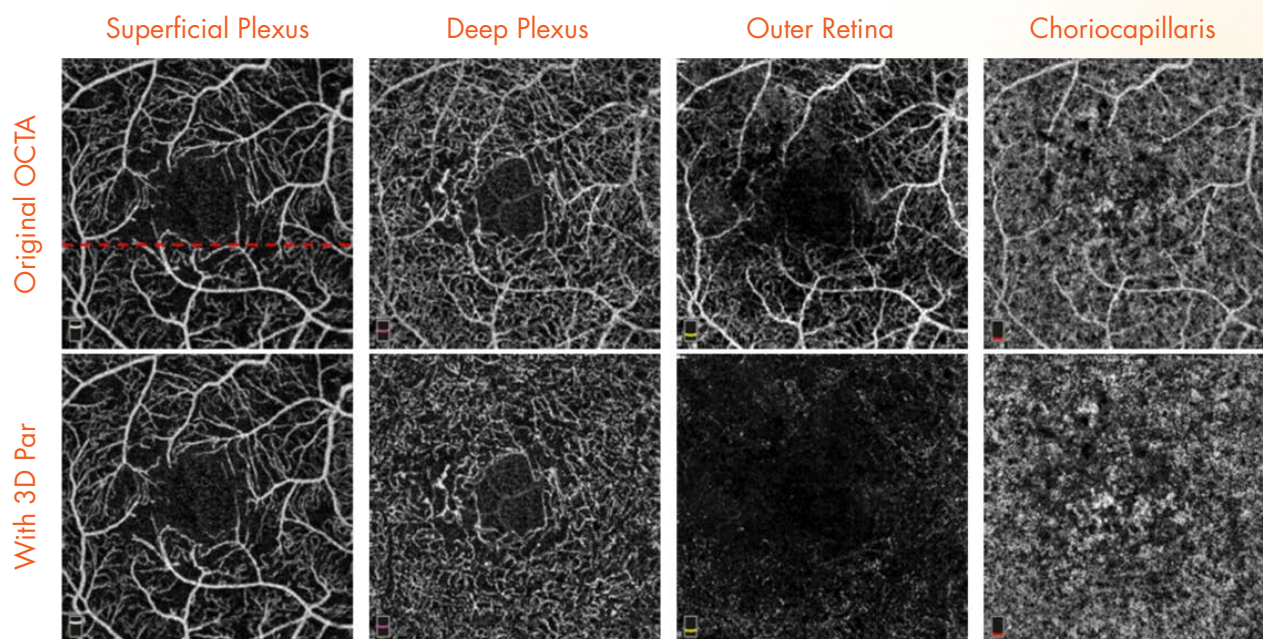

AngioVueHD Automatic Montage

10x6mm field-of-view with outstanding resolution of retinal vasculature in the macula and optic disc.

AngioVue Projection Artifact Removal

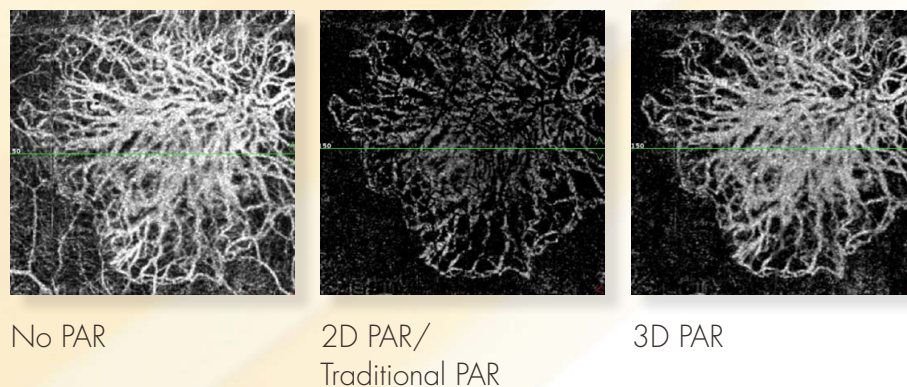

3D Projection Artifact Removal (PAR) reduces projection artifact in **all posterior layers** by performing vessel-by-vessel analysis to remove artefactual vessels while keeping authentic vasculature, which is **essential for accurate image interpretation and quantification**.

Images courtesy of Drs. Weinreb, Nudleman, Goldbaum, Zangwill, San Diego, California

3D PAR Reduces Over-Correction

Unlike traditional projection artifact removal algorithms, **3D PAR maintains the signal strength** to better display real vasculature.

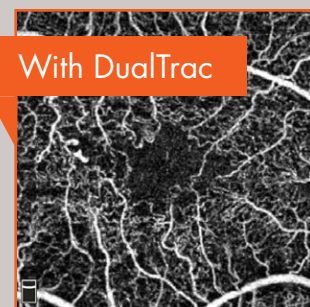

Images courtesy of Pravin Dugel, MD, Phoenix, Arizona

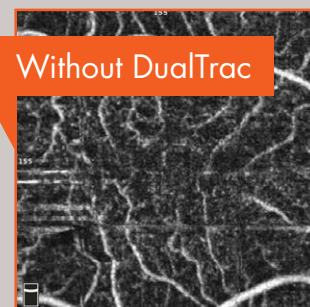

DualTrac™ Motion Correction

DualTrac Motion Correction Technology combines real-time tracking, a high-speed infrared camera (30 frames/sec.), and patented post-processing to enable true 3D correction of distortion in all directions. The outcome is ultra precise motion correction resulting in superior image quality.

With DualTrac

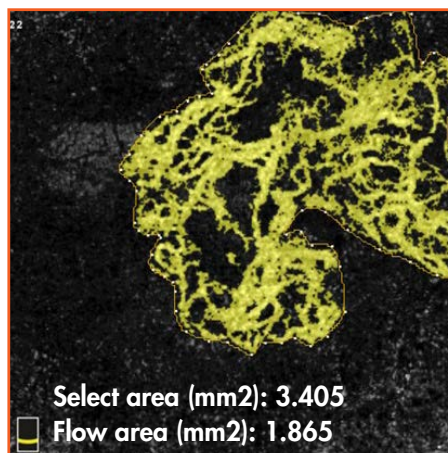

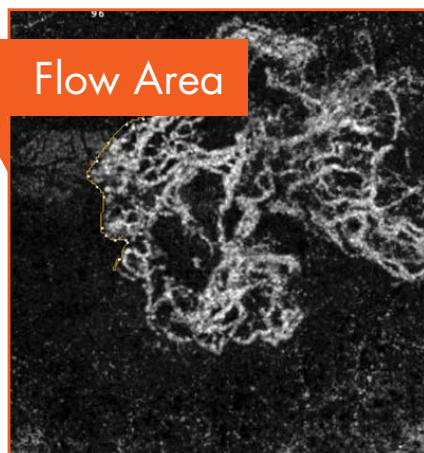

Without DualTrac

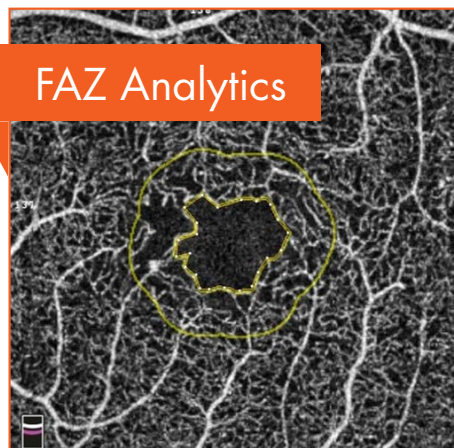

AngioAnalytics

Flow Area

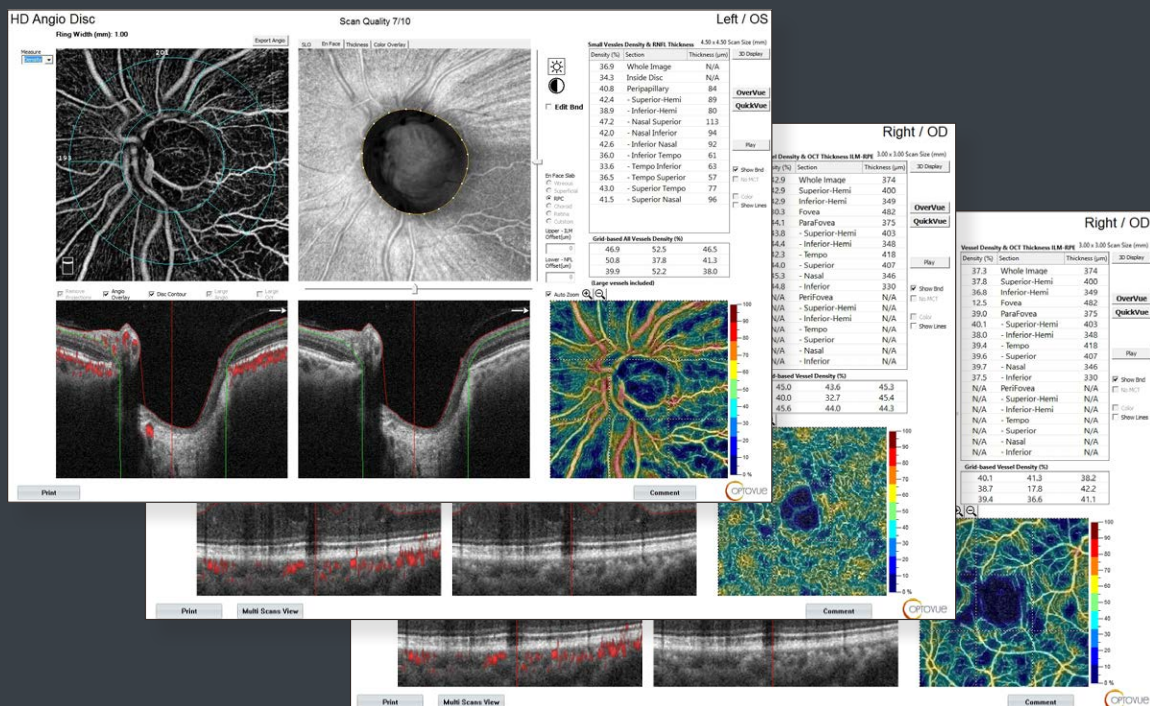

Measure Flow Area by outlining a region for vessel detection. The extracted Flow Area measurement is based on the Outer Retina slab (OPL ~ BRM).

FAZ Analytics

Measurements include Foveal Avascular Zone (FAZ) area, perimeter, and foveal vessel density.*

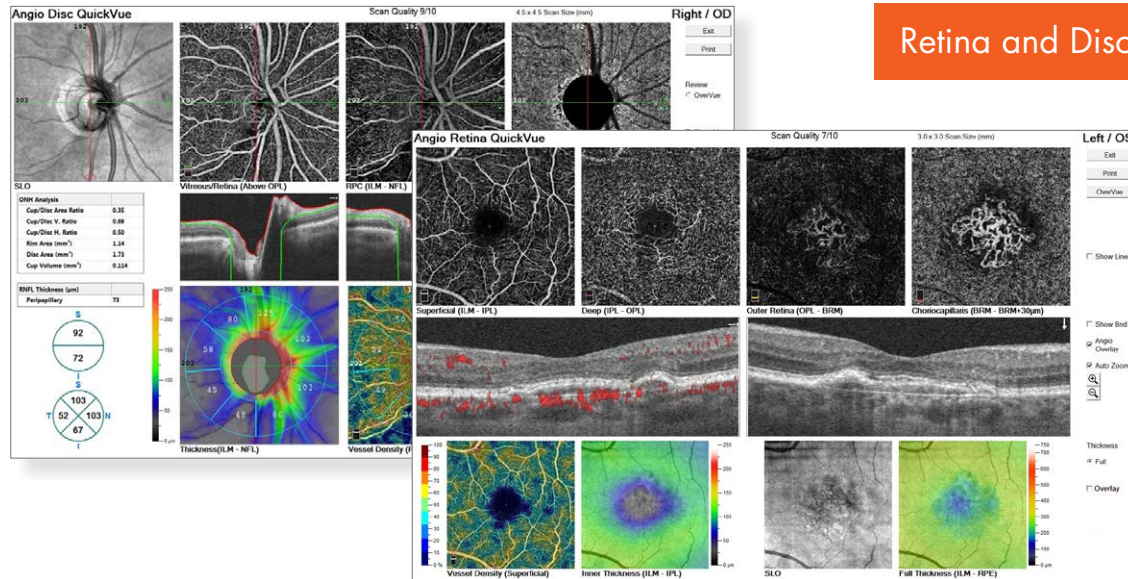

*Based on methods described by Richard Rosen, MD and Toco Chui, MD, ARVO 2016.

Vessel Density Mapping
Vessel density mapping measures the vessel density of the superficial and deep plexi of the retina as well as the radial peripapillary capillary layer of the optic disc.

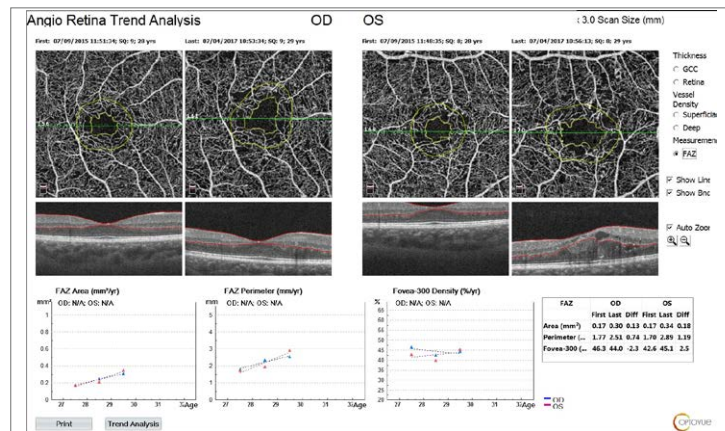

AngioAnalytics Reports

AngioAnalytics reports enable **quick and comprehensive** analysis of the retina and optic disc.

Prof. Rufino Silva, MD, PhD

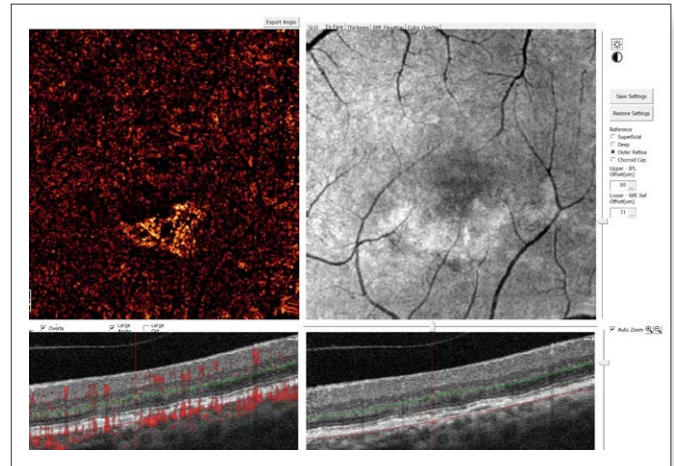

AngioVue Comprehensive

OCTA with **extensive analytical functionality** and segmentation editing capabilities.

Quickly assess four layers of vasculature with the Overview Report.

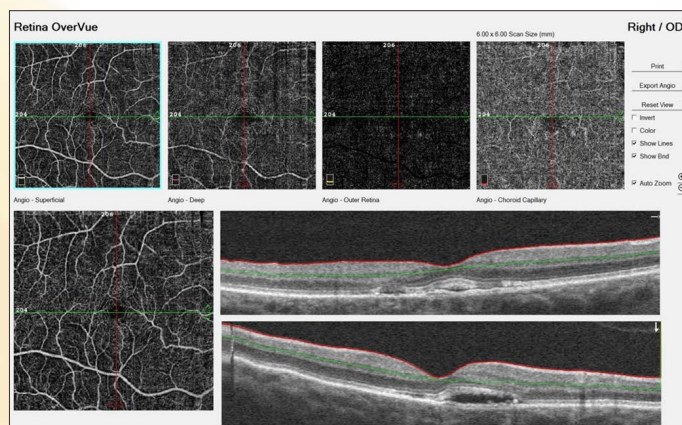

Images courtesy of Dan Esmaili, MD, Los Angeles, California

Use the OCTA Working Page to scroll through the 3D cube to isolate vascular abnormalities.

AngioVue Essential

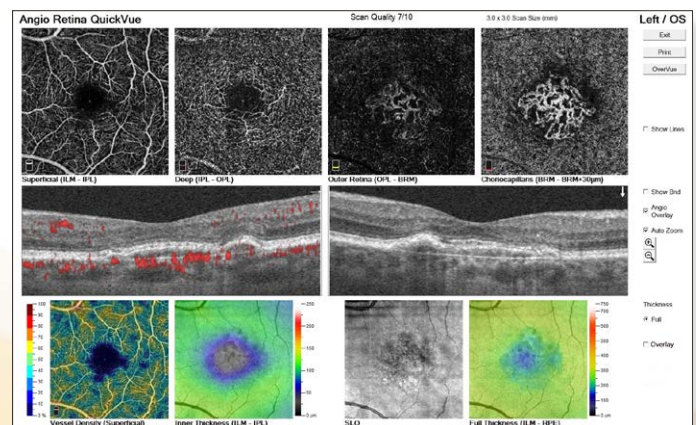

Streamlined OCTA image interpretation with a single-page report.

Assess four layers of vasculature to identify abnormalities that may require referral. Scrolling is enabled in the Choriocapillary layer.

AngioVue Retina

The first OCTA system **designed for retina specialists**.

Keep your existing OCT/FA/ICG system and patient data while reducing workflow bottlenecks with AngioVue Retina: OCTA + Retina-Only OCT Imaging.

Trend Analysis

Trend analysis evaluates change in both GCC and RNFL and estimates rate of change.

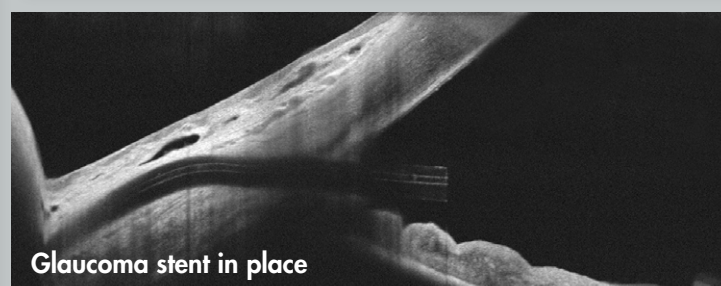

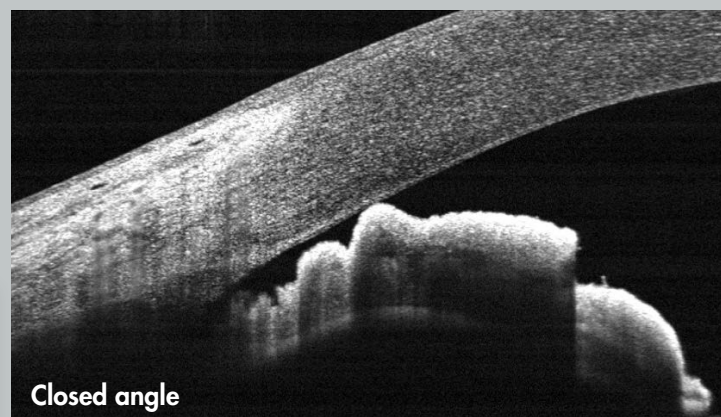

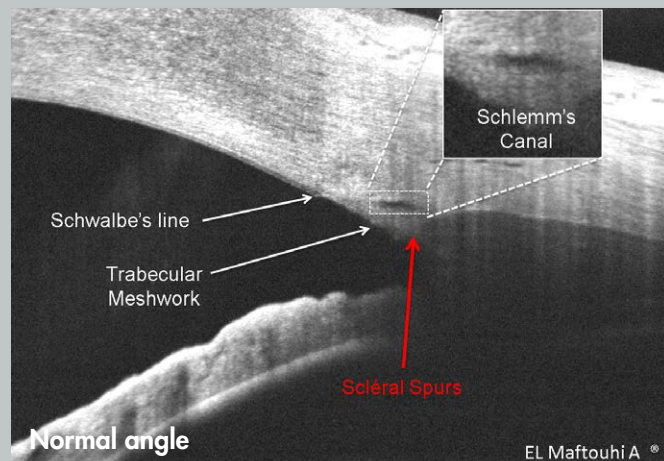

Optovue's exclusive Focal Loss Volume (FLV%) and Global Loss Volume (GLV%) provide valuable data points to aid in the prediction of visual field conversion in glaucoma suspects¹ and progression in glaucoma patients².

Trend plots approximate rate of change in GCC and RNFL thickness based on all available OCT data.

Angle Analysis

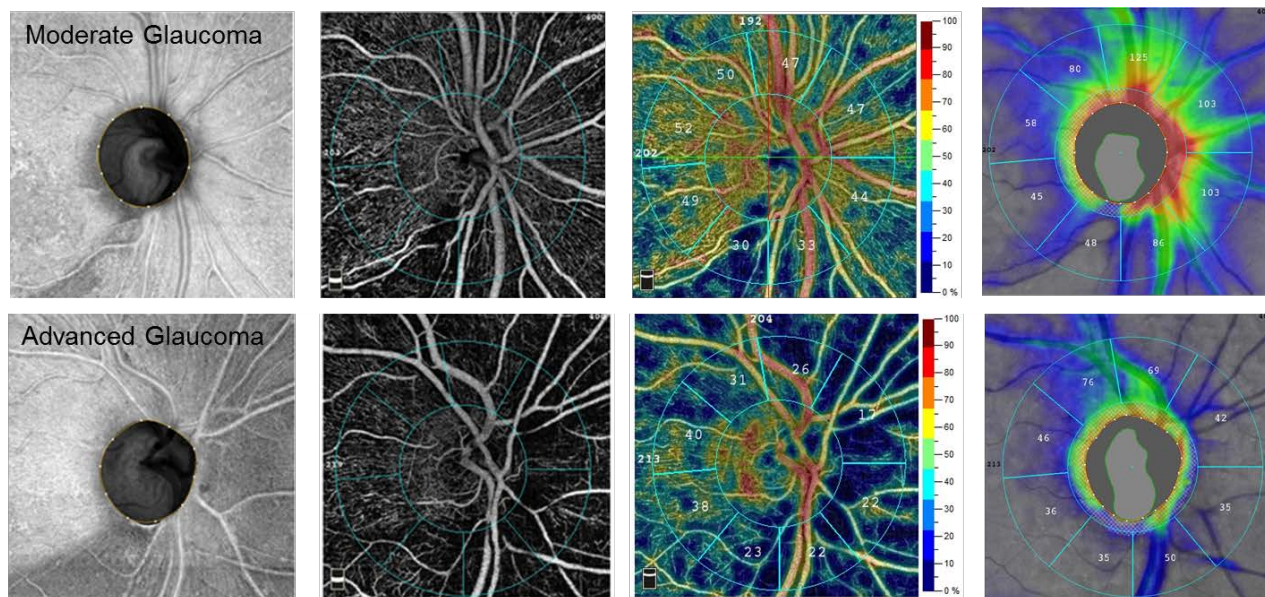

Acquire high-resolution images of the irido-corneal angle to visualize angle structure, the trabecular meshwork and Schlemm's canal. Quantitative measurement tools enable careful assessment of the angle in glaucoma patients.

2. Zhang X, Dastiridou A, Francis BA, et al. Comparison of glaucoma progression detection by optical coherence tomography and visual field. Am J Ophthalmol. 2017; 184: 63-74.

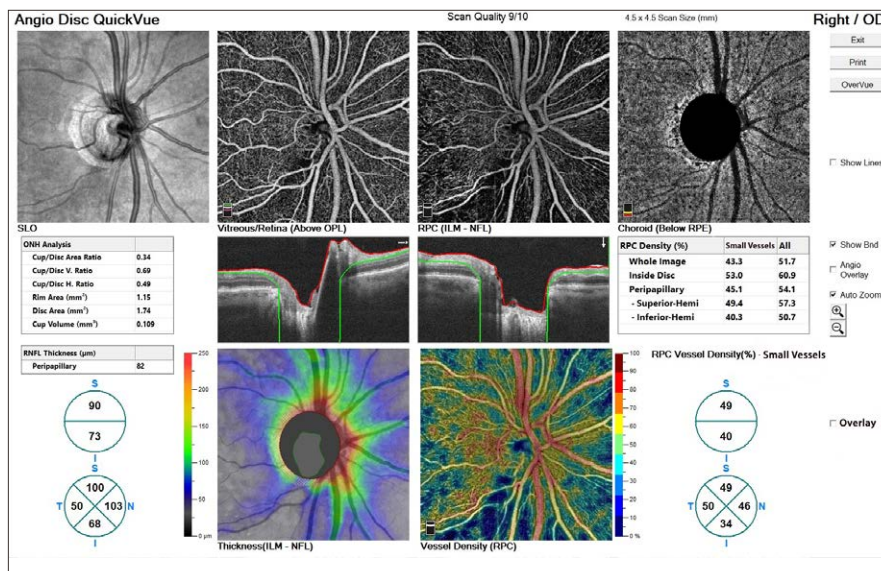

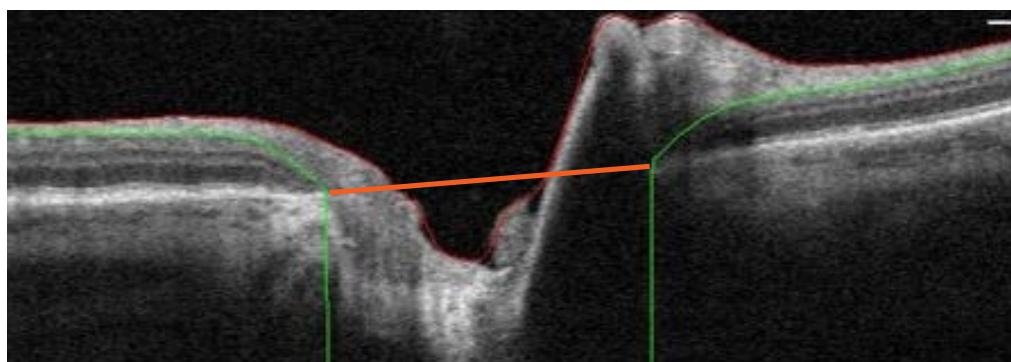

OCT Angiography of the Optic Disc

Enhance glaucoma diagnosis and management with a **single scan protocol** showing OCT intensity, radial peripapillary capillary (RPC) vasculature, RPC density and RNFL thickness.

Images courtesy of Drs. Weinreb, Nudleman, Goldbaum, Zangwill, San Diego, California

Automatic detection of Bruch's Membrane Opening (BMO) with rim and cup area measured within BMO plane.

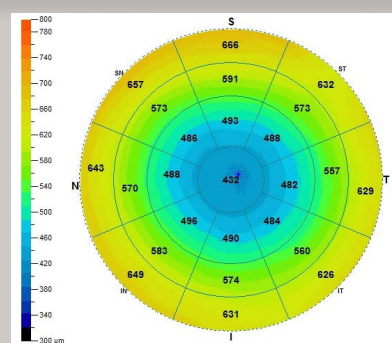

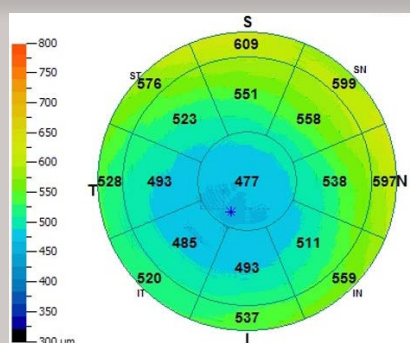

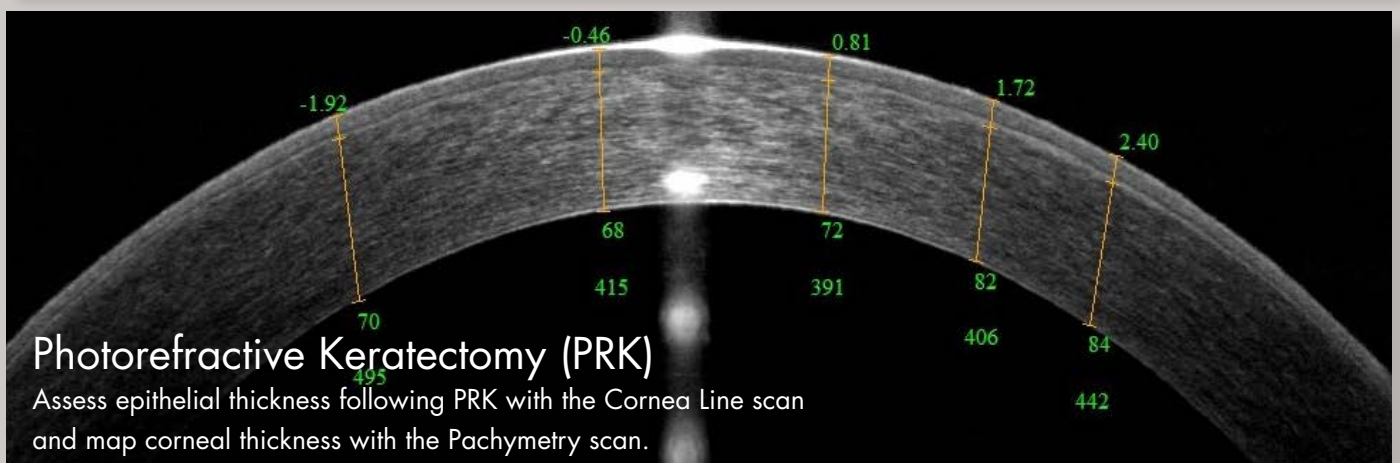

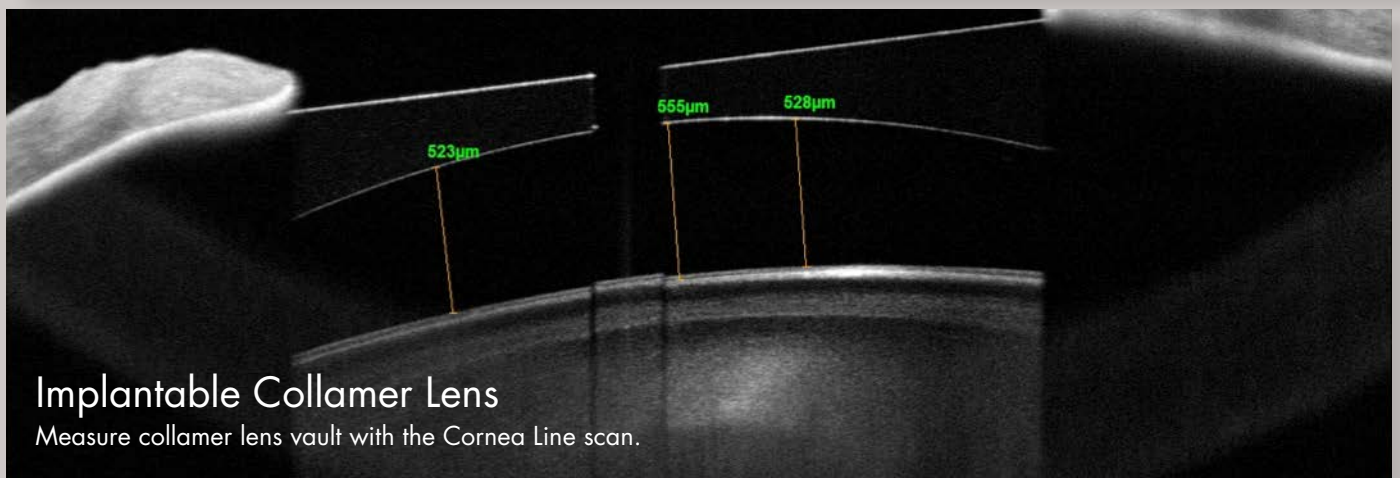

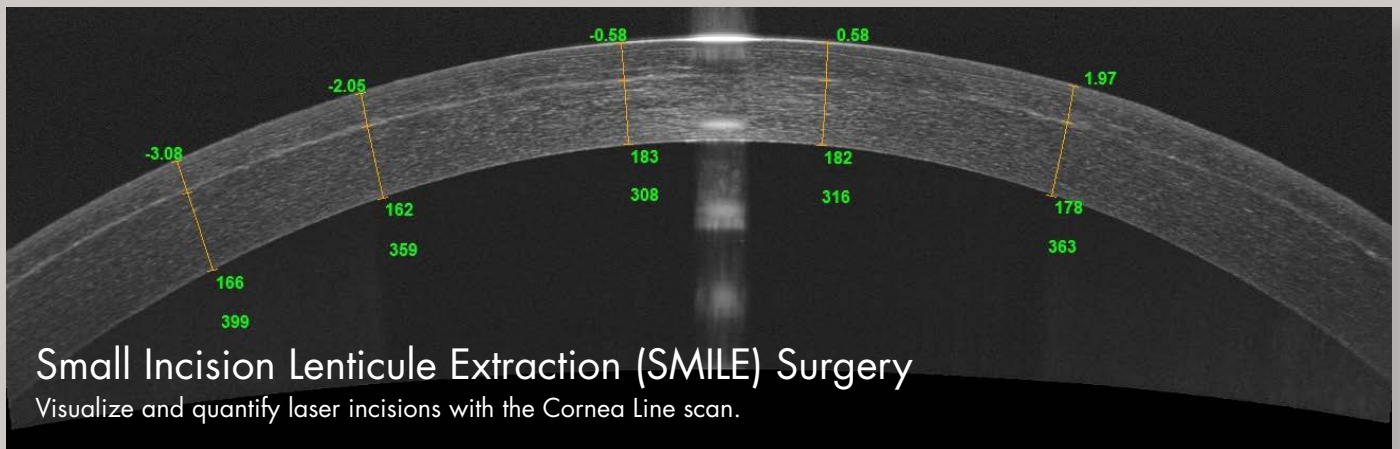

Disc QuickVue Report

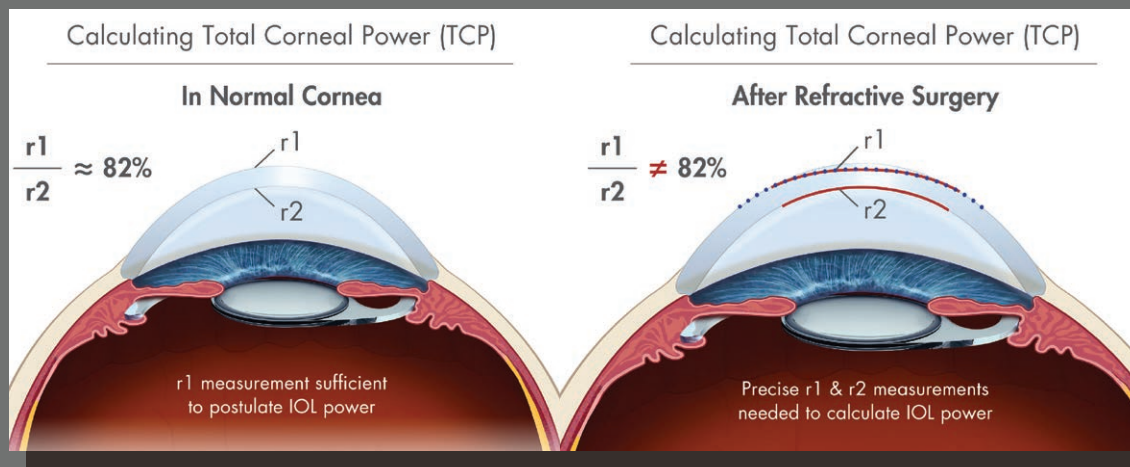

OCT and OCTA analysis in a single scan protocol. Vessel density analysis based on the RPC (ILM~NFL).

PRK and Post-Myopic PRK

Quickly map corneal thickness with the Pachymetry scan.

Cataract Surgery

Total Cornea Power (TCP)^{®*} measures the front and back surface of the cornea to enable precise calculation of corneal power in post-laser vision correction patients.

TCP DATA POINTS

Enter the data points into the ASCRS calculator to generate recommended lens power. <http://iolcalc.ascrs.org/>

CORNEAL POWER

Within central 3mm zone

	Net	Anterior	Posterior
Power	41.08	47.20	-6.22

CURVATURE RADIUS

Anterior R:	7.966	Posterior R:	6.434
-------------	-------	--------------	-------

PACHYMETRY

Layer Offset Thickness

SN-IT (2-5mm):	9	S-I (2-5mm):	8
Min:	463	Location Y:	59
Min-Median:	-33	Min-Max:	-71

Min thickness at (-0.129mm, 0.059mm) indicated as*

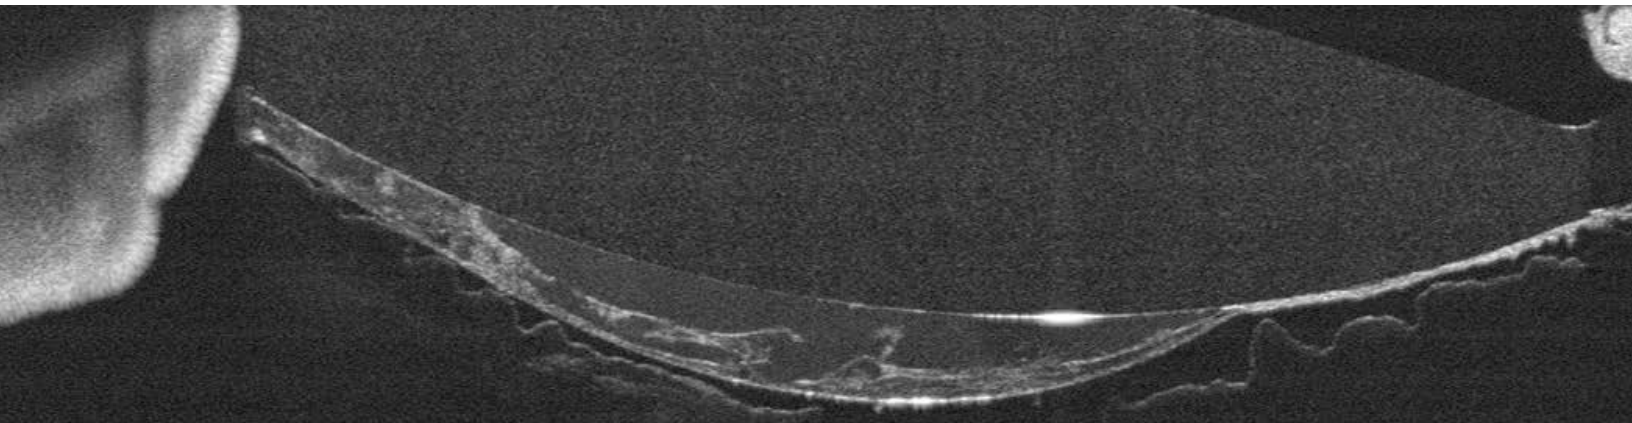

EPITHELIUM

Epithelium statistics within central 5mm

S (2-5mm):	55	I (2-5mm):	57
Min:	51	Max:	61
Std Dev:	2.3	Min-Max:	-10

Min/Max thickness indicated as*/+

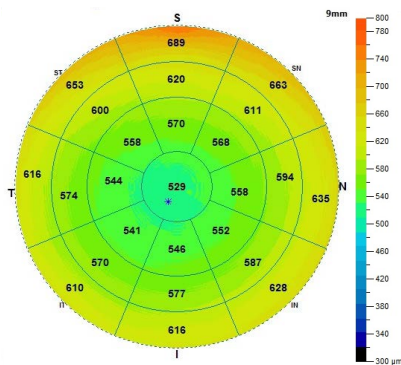

Total Cornea Power (TCP) is an additional option available for purchase on the Avanti System.

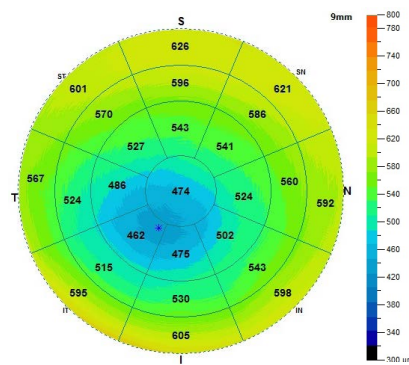

Visualize posterior capsule opacification following IOL surgery.

Keratoconus & Other Ectasias

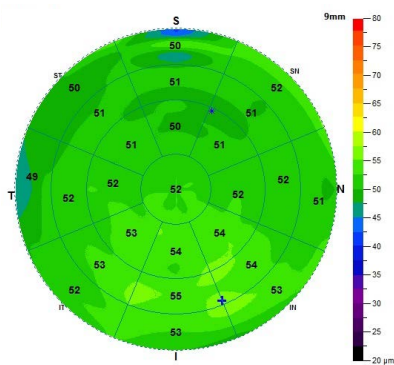

Quantify **epithelial, stromal and total corneal thickness** to aid in disease diagnosis. Pachymetric measurements may be compared to the Coollabs Keratoconus Risk Scoring System to further enhance diagnostic accuracy. (<http://www.coollab.net/resources>)

Optovue Wellness Solutions

The Wellness Exam is an Optovue exclusive available on all Optovue OCT systems that delivers a quick, easy OCT scan to promote better overall patient eye health.

Its usefulness stems from a single, comprehensive report that depicts:

- Retinal thickness and GCC[®] thickness with normative comparison
- Symmetry analysis
- FLV% and GLV%, proprietary Optovue GCC metrics that provide important information to aid in ocular disease diagnosis and management
- High-resolution B-scans

Wellness Exams benefit patients

Ultimately Wellness Exams benefit patients by helping them become more involved in their own eye health. The scanning process is simple and quick, and each patient receives comprehensive, personalized eye health information in an easy-to-understand report.

Wellness Exams benefit eye care providers

Wellness Exams benefit ECPs by providing a valuable assessment tool that can reveal the need for more extensive imaging. It also streamlines the exam process by quickly confirming normal—or helping you more efficiently diagnose pathology. Optovue's current Wellness Exam users have affirmed that the Wellness Exam improves patient involvement, loyalty and retention. This helps you grow and differentiate your eye care practice, while also providing a new revenue stream.

Horizontal & Vertical B-scans

Full Retinal Thickness with Normative Comparison

GCC Thickness with Normative Comparison

Optovue's exclusive FLV% and GLV% provide valuable data points to aid in the prediction of visual field conversion in glaucoma suspects¹

TECHNICAL SPECIFICATIONS

OCT Scanning Speed	70,000 A-scans per second
Optical Axial Resolution	~5 microns (digital pixel sampling = 3 μ m)
Optical Transverse Resolution	~15 microns
OCT Axial Imaging Depth	2 to 3 mm (dependent on scan protocol)
AngioVue Imaging Volume	304 x 304 A-scans (for non-HD scans) 400 x 400 A-scans (for HD scans)
Acquisition Time Per OCTA Imaging Volume	~3 seconds
AngioVue Imaging Size (Retina)	3x3mm, 6x6mm HD, 8x8mm (AngioVue Essential includes 6x6mm scan only)
AngioVue Imaging Size (Optic Disc)	4.5x4.5mm HD, 6x6mm HD
Field of View	12x9mm

NETWORKING SPECIFICATIONS

Operating System	Windows 7; 64-bit OS compatible
Hard Drive Availability	Minimum 50GB
Processor Speed	Minimum Intel i5 Recommended Intel i7 3 GHz or higher
Computer RAM	Minimum 8GB RAM Recommended 16GB RAM
Dedicated Graphics Card	Not required Recommended NVIDIA GTX 970
Monitor Resolution	1920x1080, 1680x1050, 1600x1024, 1600x900
Network Bandwidth	1 Gbps or higher

TABLE SPECIFICATIONS

Width	37.4 inches (950mm)
Depth	23.6 inches (600mm)
Height (Adjustable)	27.4-35.2 inches (695-995mm)

Networking Solutions

- **NetVue Pro** allows viewing and modification of images from a single Optovue OCT system on up to eight review stations. In addition, with NetVue Pro, new patient scans may be captured while existing scans are reviewed.
- **NetVue Enterprise** enables viewing and modification of images from multiple Optovue OCT systems on up to 20 review stations.
- **NetVue Web** is a browser-based solution that brings Optovue OCT images to a smart phone, tablet or PC.
- **DICOM.** All Optovue products are DICOM-compliant, featuring C-store and Modality Worklist. Optovue products have successfully interfaced with several PACS, including government systems such as the Vista Imaging System.

Innovating Technologies that Transform the Lives of Patients and Clinicians Around the World

First and Foremost in the Advancement of OCT Technology

From the first SD-OCT image generated to our transformative OCTA technology, Optovue technologies provide clinicians with information so new, they demand a different approach to treatment decision algorithms. Optovue's long history of "firsts" demonstrates that innovation is the backbone of our scientific heritage. We committed to furthering OCT image quality, efficiency and clinical applications.

Our Bold Vision

Over the past decade, and in collaboration with industry-leading ophthalmic specialists, we have pursued a bold and single-minded vision to offer advanced eye care technology to patients around the world by expanding the frontiers of OCT innovation, and significantly improving accessibility to OCT technology to make it a standard part of every eye exam.

Over 10,000 Systems in 10 Years

Since our founding, 10 years ago, we have installed over 10,000 products in many different countries. Headquartered in Fremont, Calif., we employ a passionate and talented team dedicated to the development, manufacture and sale of OCT and OCTA systems.

OPTOVUE EXCLUSIVES:

- Focal loss volume (FLV) analysis for glaucoma
- Total Cornea Power (TCP) for anterior segment surgery
- Split-spectrum technology (SSADA) on OCTA scans
- 3D Projection Artifact Removal
- DualTrac Motion Correction Technology
- Vessel Density with trend analysis for the macula (including deep plexus) and disc
